Before You Buy ANY Range—

Give Us a Chance To Tell You The Facts About The **LEONARD** Hi-Oven

HAVE you ever bought something you liked and then been disappointed in it because you found something you liked better?

Don't let that happen when you buy your range, because a range is something you expect to use a long time and you can't afford to use one with which you are dissatisfied. That's why we want you to see the Leonard Hi-Oven Range before you buy.

See the others, too. Compare them point by point with one another. Investigate their construction, their fuel consumption, their baking qualities, their convenience, the floor space they occupy, their design. And when you've made those comparisons, you'll come back to the Leonard, because you will find in it more practical time, labor, and money saving features than you ever supposed could be built into a range!

Many housewives would choose it for the high oven feature if that were its only advantage—they want to get away from the back-breaking task of stooping over an ordinary low oven.

We'll gladly show you the good points of the Leonard Hi-Oven Range. There's no obligation to buy—BUT SEE IT FIRST!
